

KNOXVILLE, TN

Manufacturer Partners

Provider of 100% OA Units, DOAS Systems, Ventilation Systems, Air Handling Units, Air Cooled and Water Cooled Condensers, Water Source Heat Pumps.

Leading manufacturer of integrated sensing and control solutions that cost-effectively reduce building energy and operation expenses.

Alerton Controls is a leader in developing direct digital controls with BACNET capability

Comprehensive line of exceptionally efficient automatic self-cleaning and manual filtration systems for use in industrial and commercial HVAC applications. Manufacturer of centrifugal separators, disc filters, sand filters, screen technologies, and bag filters.

Worldwide leading manufacturer of Cooling Towers, Closed Circuit Coolers, Evaporative Condensers, Adiabatic Coolers, and Thermal Ice Storage Systems.

Your best source for custom industrial and commercial electric comfort heaters and gas detectors for ventilation control

Industry-leading innovator of vertical packaged heat pump unit ventilators and wall-mounted air conditioning units for schools and other markets.

Operates on a global scale as a design/engineer and construction contractor for custom-built pultruded composite cooling towers. Available as 2000 to 90,000 + tons of cooling. Large facility, district cooling, and industrial process applications.

Proven technology to improve indoor air quality, reduce indoor odors and reduce particulate. Available in standalone units as well as components for installation within your air handling system.

Provider of specialty air conditioners and heat pumps for data processing, telecommunication, education facilities, and other critical environment applications.

Established in 2009, for the purpose of introducing Polypropylene Vent Systems to the North American market, Centrotherm Eco Systems is a member of the Ubbink Centrotherm Group (UCG).

Pioneers of indoor pool dehumidifiers and dehumidification control.

The original inventor of the screw compressor, Dunham-Bush is a leading provider of applied HVAC equipment including water-cooled centrifugal chillers, air-cooled chillers, air handling units, self-contained water-cooled units, condensing units, and DOAS systems.

Premium quality VAV terminal units, fan coils, and air handling units.

Comprehensive providers of engineered and prefabricated hydronic systems for process, HVAC, and plumbing.

Manufacturer of high-efficiency hotel room HVAC equipment with modulating features for optimal temperature, humidity control, and comfort.

We are more than just a water pump company. Through our solutions and services, we touch millions and millions of people every day, without most even noticing. And with that comes great responsibility. A responsibility to respect, protect and advance the flow of water for people, businesses and the planet.

Manufacturer of automatic and manual hydronic flow control valves, hose kits, and devices. Precise flow devices for better system performance.

Global leader providing optimum solutions for reducing sound and vibration inside buildings including mechanical systems, seismic restraints, engineering, floors, walls, and ceilings. Reduction of ambient sound from outdoor mounted mechanical equipment.

Manufactures steam, hot water and gas-fired heating products for industrial and commercial make-up air, air preheat and space heating applications

KNOXVILLE, TN

Manufacturer Partners

Leading provider of high efficiency packaged rooftop units, split systems, VRF, Gas Heaters, HVAC controls, furnaces, and indoor air quality products.

Plasma Air products are mounted in the central air conditioning system of any building. As air passes over the products, millions of positively and negatively charged ions are formed – just like in nature.

Manufactures a full line of condensing, non-condensing, and hybrid hot water boiler systems, as well as high-efficiency water heaters.

Manufacture focused on providing equipment solutions for energy efficiency, energy recovery, low dewpoint, chilled beams, and data centers.

Manufacturer of dilution exhaust fans, energy recovery plenums, and controls for laboratories or other critical airflow control facilities.

United CoolAir's all-indoor equipment delivers air-cooled and water-cooled solutions without placing unsightly equipment outdoors or on a roof.

Manufacturer of Natural Gas Powered VRF Heat Pump Systems as well as Combined Heat and Power Equipment.

Inventor of the modular water chiller which has expanded into air-cooled chillers, centrifugal chillers, prefabricated chiller plants, and many custom application-specific high-efficiency cooling offerings.

Quantech® has a proven track record of delivering high-performance chillers with speed, efficiency, and reliability in mind. We are led by our customers and work tirelessly to provide optimized HVAC solutions that address your facility needs.

Raywall is an industry leader in providing smart choices for any application that requires American made equipment. So for your next comfort conditioning application, call Raywall.

Manufacturers of the industry-leading high-efficiency Spirovent coalescing type air elimination products and its extended line of Spirotrap dirt separators.

The industries leading HVAC manufacturer for applications including; industrial sites, major medical facilities, pharmaceutical + more. Providing AHU, ECO Controls, Fan Array, and Modular Central Plants.

Global Manufacturer of quick-ship air handling equipment and energy recovery air handlers.

Yaskawa is the largest global variable frequency drives manufacturer with over 30 years of Building Automation System (BAS) and HVAC experience. Their variable frequency drives are designed for HVAC

We offer the widest range of products and solutions for extraction and filtration of dust and particles, welding fumes, exhaust fumes, oil mist, gases and combustible dust. Your industrial air filtration expert!

Q-PAC provides the most unique, robust, and yet simplest fan system products and experience for those involved with design, installation, and operation of a commercial air handler due to our revolutionized and innovative fan system technology.

Quality evaporative chillers, evaporative cooling equipment, custom DX units, Coils, and specialty refrigeration equipment.

Provider of customizable finned tube radiation and hydronic heating systems.

Provider of rooftop units, air handling units, air-cooled condensers, and DOAS units designed to make installation, start-up, and servicing easier and less costly.

Pioneer in the development and manufacturing of geothermal heating and cooling systems, hybrid heat pump chillers, and Geothermal DOAS units.
